SMART DIGITAL RODENT MONITORING

Get SMART! Meet an intelligent system that uses technology, not poison, to monitor for rodents 24/7. Now available on select Home Protection plans.

Our expert technicians will install SMART monitoring devices in high risk rodent areas of your home. Once installed, SMART uses a clever sensor system to monitor for pest activity.

If rodent activity is detected, your local Flick branch will contact you to arrange a treatment plan to resolve the problem if required.

WHY CHOOSE SMART?

- Uses technology, not poison
- Sustainable, Non-toxic. Safe for families and pets
- Monitors 24/7 for pest activity
- Installed in rodent focused areas of your home

GET SMART IN 3 EASY STEPS

1 Analyse & Plan

Our team will recommend the best solution for your property, as part of a Flick Home Protection plan.

2 Install & Connect

We install our digital rodent monitoring system in high risk areas of your home. Sensors operate on their own network.

3 We Service, You Relax!

Set & forget. Our team will contact you if any rodent activity is detected and arrange a tailored treatment plan.
